FROM: Tony Gallegos, Reclamation Engineer *aa*

RE: Site Inspection, Five Mile Mine, M/045/006, Tooele County, Utah

Date of Inspection: December 11, 1992  
Time of Inspection: 1330 - 1400  
Conditions: Overcast, cold  
Participants: Jerry North, Interstate Brick Co.; Tony Gallegos, DOGM

Purpose of Inspection: To evaluate the current status of the site.

Interstate may expand the existing 3e pit to the northeast. This expansion would probably take place within the next three years. Interstate may extend the 3e pit to the south or excavate a new pit where the 2d dump materials are located if the clay reserves are worth the investment. Topsoil from the 3e pit has been stockpiled in the area northeast of the pit. Deep fissures are present southwest of the permit boundary. These fissures may be the result of caving of the extensive underground workings in the area. Photographs were taken to document the current status of the site.

According to Division files, the Five Mile mine is currently bonded for 71 acres of disturbance. The last annual report for this site listed 25 acres of disturbance. The Division has no immediate concerns at this site.
